

# SME Leader Risk Evaluation

*Independent, scientifically validated and comprehensive evaluation, risk assessment and identification of development needs for SME Leaders.*

## INTRODUCTION

SME LEADER AND RISK EVALUATION was developed through an identified need for an independent assessment and monitoring system that scientifically evaluates potential SME Leadership and which provides a framework for the coaching and guidance of Leaders through the various phases of their company—from implementation to growth and maintenance.

With a proud history of service to blue chip companies spanning a number of various industry sectors, Bioss SA provides strategic and operational business solutions, academic research and statistical analysis, together with full assessment service, training in conducting assessments, job profiling and database management, matching people with work, strategic fit, organisational mapping as well as providing individual and organisational development.

## SME LEADER RISK EVALUATION

### What we offer :

- ❖ A comprehensive assessment of capability, values and competencies
- ❖ A risk assessment in terms of granting supplier contracts to the SME
- ❖ Short listing of potential suppliers in terms of leadership risk
- ❖ Identification of development needs for BEE SME leaders

The directors and management of Bioss SA maintain an indepth understanding of the South African economic situation and the need to develop the country's economic potential through Black Economic Empowerment in order to enable South Africa to compete globally, utilizing its full human resource capital.

Bioss SA is an independent, South African owned and managed company, dedicated to assisting clients in the development and organisation of their people and structures for sustainable viability.

*We look forward to being of service to you*
